# THE TRUMPUTING OF A NEW PARADIGM

A new American doctrine for the Strategic Defense of the Earth (SDE)<sup>1</sup>

By Pierre Beaudry, 7/12/18

---

Along with the happiness of Atman doctrine of Prime Minister Modi and the win-win policy of Xi-Jinping, a new doctrine between President Trump and President Putin must also be implemented around the planet for the defense of Earth this coming week. Accordingly, on June 20, 2018, President Donald Trump signed the [NATION NEAR-EARTH OBJECT PREPAREDNESS STRATEGY AND ACTION PLAN](#) for the defense of the Earth.

It is to be hoped that this new American defense strategy, which has been a long time project of Lyndon LaRouche<sup>2</sup> and which represents the best strategic doctrine to replace the mad British doctrine of geopolitics, shall become the means of collaboration which will bring the nations of the world into focus with the Schiller Institute's doctrine of the Common Aims of Mankind.

The 23 page document prepared by The National Science and Technology Council (NSTC) and signed by President Trump is aimed at not only detecting and mitigating the impact of Near Earth Objects (NEO) but also at increasing international collaboration in developing a doctrine of the Common Aims of Mankind. The document stated:

“The United States will strengthen and exercise procedures and protocols for assessing NEO threats, communication regarding threats, and response and recovery activities. Coordinated communications and

notifications within the U.S. Government and with foreign governments will improve impact emergency preparedness and reduce the physical and economic harm to the Nation.”<sup>3</sup>

This new American strategy is the first official attempt to anticipate the danger that an asteroid hitting the Earth might represent for humanity. It is not yet “the great step for mankind” but as Aaron Miles of the White House’s Office of Science and Technology Policy (OSTP) stated: “This is more about figuring out how to use those resources smartly, and do so in a coordinated and cooperative way across the United States government.”<sup>5</sup>

<sup>3</sup> [NATION NEAR-EARTH OBJECT PREPAREDNESS STRATEGY AND ACTION PLAN](#). “Near-Earth Objects (NEOs) are asteroids and comets that come close to or pass across Earth’s orbit around the Sun.”

It is high time to sign a collaboration agreement with the Russians, the Indians, and the Chinese on such matters. The agreement with Putin could also include NATO in the same higher strategic framework. Let's not wait until you hear someone yell:

**“NI HUYA SEBE!”**
